Lecture 1

Teachers Assistant: Niklas Karvonen
nikkar@ltu.se

Expectations:
- Learn to use the oculusAPI
- Learn about pervasivecomputing, what it is, what is it's future

- I would like to learn by reading research regarding this area.
- Learning by doing (Program, hands on experience)
- Lectures/Seminars regarding new research areas.

- I want to create something like a virtual desktop for a HMD (Head Mounted Device).

Date	Deadlines:
6th november	First group meeting
15th December	Final seminars
15th January	Research paper as a final report

Seminars:
> Select 4 papers to read (Related to your project) AND of interest to you AND not older than 3 years!
> Write a summary of what was interesting or useful for you! One A4 in total.
> Send the A4 to Niklas (CC kåre) before Monday the 17th November.
>
> Select 1 paper of the 4 to present.
>
> Opponent of 1 paper.

Requirements for the course.
> Information on your project (description, members, etc).
> A link to your 'work in progress'
> The current status of your project (maybe as a news page)
> Useful links or other information of interest related..
